

## THE TOTAL PACKAGE FOR INDUSTRIAL PLANT MAINTENANCE & FACILITY SERVICES

### Client Focused Services Designed for You

We are a customer-focused, integrated maintenance company operating projects throughout the Southeast and Mid-Atlantic states. As a women-owned business certified by the Women's Business Enterprise National Council (WBENC), we are a licensed, full-service general, mechanical, and electrical contractor, and operate as a direct-hire open shop.

Our services are structured to proactively address your maintenance and operations needs in the areas of:

- Plant & Facility Maintenance
- Construction Services & Capital Projects
- Production & Operational Support

We are dedicated to customer relationships built on mutual trust and satisfaction. All services are performed safely and in a manner that achieves customer goals in quality, value, and performance. We are proud to employ over 750 members that comprise Team GreenWood and provide continuous professional development through technical and leadership training.

#### Transparency

We provide visibility of our operations and costs to give client's leadership the information they need to make informed business decisions

#### Flexibility

By design, as business conditions change, client's leadership can work with us and have the visibility to help evaluate optimal processes and staffing needs to make any required project adjustments

#### Cost-effective

Our services approach and solutions delivery model are lean and efficient based on best industry practices that result in sustainable improvements, cost reductions and overall value

### Industries & Markets Served

- Advanced Materials
- Aerospace
- Automotive
- Bioscience/Biotech
- Chemicals
- Energy
- Food Processing
- Life Sciences
- Pharmaceuticals
- General Manufacturing

**Our ongoing focus for over 30 years remains on continuous improvement through performance metrics and management. We consistently deliver significant cost savings to our clients year over year.**

*"GreenWood delivers exceptional maintenance knowledge and skill sets that help minimize disruptions and keep our operations lean."*

# High Value Solutions for Continuous Improvement

## Plant & Facility Maintenance

Whether for industrial plant settings or facility environments, GreenWood, Inc. offers the right balance of services that proactively address your maintenance needs. Our flexible approach means we can assume full responsibility for your maintenance program or provide supplemental support for your existing team.

To ensure best practices are consistently leveraged, we maintain a focus on continuous improvement based on identified opportunities and defined deliverables. At the core of this approach is our expertise in developing proactive maintenance programs designed to reduce downtime, eliminate unnecessary costs, and increase reliability for consistent asset performance. Maintenance performance data allows our teams to track, measure and report on progress to ensure objectives are being met, value is delivered and productivity maximized. Taking this approach allows us to share leading practices across our project sites for consistency in overall performance.

- Preventive Maintenance
- Predictive Maintenance
- Planning & Scheduling
- Contract Maintenance
- Site Leadership
- Project Management
- Boiler & Heater Repair
- Plant Services
- Materials Management

- Contractor Management
- Orbital & Code "R" Stamp Welding
- Turnaround & Capital Projects Management

## Construction and Fabrication

For construction, modification or expansions of plants and facilities, GreenWood offers comprehensive construction support services designed to meet schedules, adhere to budgets and ultimately achieve project goals. This includes Construction or Modification of Plant Buildings, Plant Construction or Facility Expansions. Our core services focus on Overall Project Management, Project Controls, and Performance Analysis to ensure all activities related to planning, scheduling and execution are executed timely and within established budget parameters.

Our fabrication facilities are capable of executing services for Piping, Equipment Skids, Structural Steel, Hygienic Welding and Orbital Welding. GreenWood has an "R" NBIC Certificate of Authorization.

## Production & Operational Support

Customers often turn to GreenWood to provide resources for operational support for facility and plant operations. GreenWood can supply qualified, trained and experienced resources to address production line needs, distribution and warehousing, assembly and product packaging, safety, and general administrative support functions.

## Company Partnerships

By teaming up with companies and associations that align with our core values, delivery model standards and business philosophy, we are able to enhance our solution offering and further strengthen our skill sets in performing client work.

- NCCER Certified Partner
- Society for Maintenance & Reliability Professionals (SMRP)
- Project Management Institute (PMI)
- ASME Certified "R" Stamp

## Zero Incidents

The foundation of GreenWood's business success is our company commitment to creating a safe and healthy environment for our employees and customers. Safety is our first order of business in everything we do. This commitment involves the total dedication by every GreenWood team member to ensure we operate in a safe workplace. We believe that all Health, Safety & Environmental (HS&E) incidents, injuries and illnesses can be prevented with proper proactive planning, employee training, constant awareness, diligent enforcement and genuine care. Through our "Always Aware" safety program, personnel at all levels maintain a safety mindset to produce outstanding job results with zero incidents.

### Safety Performance Recognition

- Over 20,000,000 Safe Work Hours
- NCDOL Gold Safety Award
- McGriff Safety Recognition Award
- Affinity Risk Control Safety Award
